November 29, 2017

Dear Resident,

Carroll County and the Town of New Windsor are working on a joint project to rehabilitate and upgrade the storm water management pond in the Blue Ridge development. The project when will complete will eliminate the existing wet pond. In its place will be a state of the art dry pond with a sand filter bottom. The new pond will provide improved wear quality and contribute to efforts to clean up the Chesapeake Bay. The project requires the removal of a large quantity of earth. The earth will be hauled by truck to the decommissioned wastewater lagoons on Water Street adjacent to the waste water treatment plant. The lagoons are being filled in anticipation of creating a new ballfield.

The haul route for trucks transporting the earth will be Old New Windsor Road to Route 31 to Route 75 (Green Valley Road) to Route 31 (High Street) to Manning Drive to Water Street to the lagoon. Hauling is anticipated to begin the first week of December and continue for several weeks depending on the weather and the pace of work. Hauling will only take place during normal daylight working hours. Hauling is not anticipated on weekends or holidays. A map of the haul route is enclosed.

If you have any question please feel free to contact town Hall at 410-635-6575 or by email at [info@NewWindsorMD.org](mailto:info@NewWindsorMD.org).
