I have a couple of items that need your assistance. First, the Fair Trash Reduction, (FuTuRe), a pay as your throw trash collection pilot program has yet to be decided. There are a few issues the council needs clarification. We anticipate representatives from County government and from WasteZero to attend the July Council meeting. Due to July 4 being a holiday, our Town Council meeting will be held on Wednesday, July 11, 7:00 PM in the Community Meeting Room. I encourage everyone to attend to have their issues addressed.

The other item is the Town’s Dodransbicentennial Celebration next year! Right now, you are probably asking, what in the world is the mayor talking about? It is actually the name for the 175th Anniversary of the incorporation of the Town of New Windsor in 1844. I am in the process of forming a committee to organize events for next year. I plan to ask our organizations, churches, and business community to provide two members to be on the committee. I am also looking for two At-Large community members who would like to be on the committee as well. If you are interested in either serving on the committee or helping with events, please send me an email at nroop@newwindsormd.org.

May you have witnessed the beginning of the College Avenue & Blue Ridge Avenue Street Project. The first phase of the lowering the water line at the bottom of College Avenue has begun. The lower part of College Avenue will see a substantial lowering of the pavement. This will allow for a safer access to the street from Green Valley Road, especially for fire apparatus. This project is the result of being awarded a grant for $673,300 from the Maryland Department of Housing and Community Development. We hope to put the 2nd phase of the project out to bid in September.

If you have any questions or issues about the mentioned above items or anything concerning the Town of New Windsor, please feel to contact me at nroop@newwindsormd.org.

Patience is not simply the ability to wait - it's how we behave while we're waiting.

Joyce Meyer

| Sept 3     | Labor Day, Office Closed |
| Sept 4     | Walk W/ Mayor |
| Sept 5     | Yard Waste |
| Sept 5     | Town Council - 7:00 PM at Community Meeting Room |
| Sept 17    | Work Session - 7:00 PM at Community Meeting Room |
| Sept 19    | Walk W/ Mayor |
| Sept 19    | Yard Waste |
| Sept 20-21 | Read Water Meters, Please keep dogs in those days |
| Sept 24    | Planning Comm. - 7:30 PM at Community Meeting Room |

**October**

| Oct 6      | MUSIC ON THE MAIN!! 1:00-7:00 PM |
| Oct 27     | Shred Day 9:00 AM-12:00 PM |
| Oct 27     | Bulk Trash Day 8:00 AM-1:00 PM |

**Yard Waste**

Yard Waste will be picked up on the first and third Wednesdays of each month starting April 5 and ending in October. Yard Waste includes grass cuttings, leaves, shrub clippings, flowers, small plants and branches not over 4 inches in diameter or 4 foot in length. Branches must be tied in bundles. Yard waste should be placed in brown paper bags or containers that can be easily dumped; these containers should not weigh over 40 pounds.

**Ecology Services**

Ecology Services are taking over trash service starting July 1st. Trash/recycle pick-up will stay on Tuesday's.

Please keep a look out for a post card from Ecology about getting a new recycle bin.

**MARK YOUR CALENDAR'S!!**

**Town of New Windsor and NWSB Bank is hosting a SHRED DAY!!**

Saturday, October 27, 2018

Time: 9:00 AM - 12:00 PM

Location: Back parking lot of the NWSB Bank New Windsor location.

213 Main Street
New Windsor, MD 21776

**FIREWORKS**

The Mayor and Town Council would like to remind everyone:

**FIREWORKS ARE STRICTLY PROHIBITED WITHIN THE TOWN LIMITS**

**NEW WINDSOR FIRE DEPARTMENT**

**Crab Feed**
Saturday, July 21
New Windsor Fire Hall Engine Bays
5:00-8:00 PM
Price: $45.00

**Menu:**
- Steamed Crabs
- Hot Dogs
- Potato Salad
- Crab Soup
- And other items

If you would like to purchase a ticket, please contact Dorothy Rue
(410)-775-7402

**Tuesday Night Bingo**
Cash Prizes Only

- 4 Early Birds
- 16 Regular Games
- 3 Special
- 2 Quickie Games
- 1 Jackpot Games

Refreshments available
Doors open at 5:30 pm
Food available at 6:00 PM Games
start at 7:00 pm

**Crab Cake Sale**
Tuesday, October 30
Cut-off for orders: Tuesday, October 16
Price: $6.00
Crab cakes are sold fried or raw
If you would like to order crab cakes, call
(410)-775-7402 or (410)-635-2909

**Sub Sale**
Wednesday, August 22
Cut-off for orders: Friday, August 11th
Price: $5.50
Sub comes with bag of chips
If interested in purchasing any subs, please call (410)-635-2909 or (410)-775-7402
Deadline for orders Friday, August 10
**St. Paul's United Methodist Church**

- **Crab Cake Sale**
  - Crab cakes can be cooked, uncooked or a crab cake sandwich. Cost is $6.50 each and orders can be placed by calling the church office at 410-635-2442.
  - Orders can be picked up at Windsor Station Fire Hall on Thursday, July 19.

- **Vacation Bible School**
  - Monday, August 20 - Friday, August 24 from 6:30 pm - 8:30 pm at St. Paul United Methodist Church.
  - This year's theme is Rolling River Rampage.
  - Children aged 3 years old through rising 5th grade are welcome to attend.
  - Registration is free and can be done online at [https://rrr.cokesburyvbs.com/saintpaulnewwindsor](https://rrr.cokesburyvbs.com/saintpaulnewwindsor)

**Just a Reminder!**

Effective July 1st, 2018 water and sewer billing rates will be adjusted. You will see the adjustment beginning with the October 2018 quarterly billing. The new rates for sewer will be $95.00 for the base rate and $7.89 per thousand gallons for usage. The new rates for water will be $135.00 for the base rate and $3.86 per thousand gallons for usage. As always, you may find this information on the Town website at [www.newwindsormd.gov](http://www.newwindsormd.gov)

On May 21, 2018 Resolution No. 05-21-18 was passed to reduce water/sewer rates. A copy of the resolution is on the Town’s website, www.newwindsormd.gov

Below is the new quarterly water/sewer rates.

MUSIC on the MAIN

Saturday, October 6, 2018, 1:00 - 7:00 PM

♩ Live Music
1:00-2:30 Morning Sky
2:30-4:00 Trinidad and Tobago Baltimore Steel Orchestra
4:00-5:30 The Josh Christina Band
5:30-7:00 Half Serious

Beer & Wine Garden • Food •
Arts & Crafts • Games & Children’s Activities

♩ Main Street in New Windsor will be closed from Union Bridge Road to High Street for the event!

For more information or to reserve a Music on the Main vendor space, please contact the Town of New Windsor at 410-635-6575 or info@NewWindsorMD.org

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain compounds in water provided by public water systems. We treat our water according to EPA’s regulations. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Sources of Drinking Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Lead Prevention

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Town of New Windsor is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your drinking water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the EPA Safe Drinking Water Hotline at 1-800-426-4791 or at http://www.epa.gov/safewater/lead.

Important information regarding Gross Alpha Emitters:

Alpha emitters are naturally occurring radiations in soil, air and water. These emitters generally occur when certain elements decay or break down in the environment. The emitters enter drinking water through various methods including the erosion of natural deposits. There are no immediate health risks from consuming water that contains gross alpha, however some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer. Currently, the highest level of gross alpha detected is 3.6 pCi/L which is below the 15 pCi/L MCL.

If you have any questions about this report or your drinking water, please call Jay Janney at 410-729-8350 or email your request to jjanney@mdnv.com.

Town of New Windsor Treated Water Quality Report 2017

Important Information About Your Drinking Water

We’re pleased to present you the Annual Water Quality Report for 2017. This report is designed to inform you about the water quality and services we deliver to you every day. Maryland Environmental Service (MES), an Agency of the State of Maryland, operates the water treatment facility and prepared this report on behalf of the Town of New Windsor.

The Environmental Protection Agency (EPA) regulates Public Water Systems and the contaminants found in water through the Implementation of the Safe Drinking Water Act (SDWA). The SDWA sets regulations and guidelines for how public water systems operate and identifies several hundred drinking water contaminants, establishes monitoring frequencies and limitations. The Maryland Department of the Environment (MDE) is responsible for the enforcement of the SDWA and routinely complete Sanitary Surveys as part of their ongoing inspection and monitoring program. MES provides safe dependable operations of the water system and is dedicated to consistently providing high quality drinking water that meets or exceeds the SDWA standards.

If you have any questions about this report or have questions concerning your water utility, please contact Jay Janney at 410-729-8350, e-mail jjann@menv.com.

For More Information:

For the opportunity to ask more questions or participate in decisions that may affect your drinking water quality, the Town Meetings are held at the 1100 Green Valley Road, in the “Community Meeting Room” of the recently renovated Carroll County Library Admin building or contact the Town Office for additional information at (410) 635-6575.

Inside This Issue:

Definitions 2
Special Points of Interest 2
Water Quality Report 3
Alpha Emitters 4
Sources of Drinking Water 4
Lead Prevention 4

The Town of New Windsor water works consists of two drilled wells in the Sams Creek Phylite formation and a natural spring. After water is pumped out of the wells and collected from the spring, disinfectant is added to protect against microbial contaminants. The Maryland Department of the Environment has performed an assessment of the source water. A copy of the results is available. Call Maryland Environmental Service at 410-729-8350.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

Definitions:

- Maximum Contaminant Level Goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- Action Level - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
- Treatment Technique (TT) - A required process intended to reduce the level of a contaminant in drinking water.
- Turbidity - Relates to a condition where suspended particles are present in the water. Turbidity measurements are a way to describe the level of “cloudiness” of the water.
- pcU/l - Picocuries per liter. A measure of radiation.
- ppb - parts per billion or micrograms per liter.
- ppm - parts per million or milligrams per liter

Special points of interest:

Drinking Water, including bottled water, may reasonably be expected to contain at least small amounts of some compounds. The presence of these compounds does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency’s (EPA’s) Safe Drinking Water Act Hotline (1-800-426-4791).

The table on the next page lists all the drinking water contaminants that were detected during the 2017 calendar year. The presence of these compounds in the water does not necessarily indicate that the water poses a health risk.

Unless otherwise noted, the data presented in the table is from testing done January 1 – December 31, 2017. The State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year.
