May 28, 2020 received a call regarding a sewer back up on Atlee Ridge Road, responded to the location along with Mayor Roop and Director of Public Works, Wayne Myers. Upon investigating there was a pipe that was clogged not allowing flow to the pump station. Fogles’s Septic was alerted for an emergency response and upon arrival were able to jet vac the blockage to open up the flow. The blockage was caused by a very large amount of grease. This has been a continual problem in the Atlee Ridge development and Councilmember Palsgrove, Director of Public Works Wayne Myers and Town Manager Dye are working on language to place on a letter to each of the residents in the Atlee Ridge development to educate them on this ongoing problem. This particular incident cost the Town $3,000.00.

Town Manager’s Report:
Beginning Monday June 1st. Town Hall and Public Works staff went back to working regular hours. Social distancing will still be used as much as possible. With few office staff, Public Works mainly working either downstairs or outside and the spaciousness of new Town Hall, staff can easily stay distanced.
Town Hall will remain closed to the public until further notice. This is in line with what the other CC municipalities are doing.

Director of Public Works
Wayne has been very busy handling a multitude of water and sewer related issues. One item of note was a sewer back up on Thursday night May 28, 2020 just above the Atlee Ridge Pump Station in the area of 3200 Atlee Ridge Rd. This resulted in an emergency call and response by Fogle’s Septic to clear the blockage. The blockage was cause by crease, rags and wipes. This sewer back up cost the Town and it’s tax payers $2,800 for Fogle’s services not to mention Town staff’s time. The Director of Public Works, Councilman Palsgrove and Town Manager are working on a letter to be distributed to Atlee Ridge residents prior to the next meter reading at the end of this month. The flyer will detail the problem, provide information and encourage a community effort to eliminate the problem. The best way to report a water or sewer problem is to call Town Hall. The message will get forwarded to the Director of Public Works during regular working hours as well as after working hours. Social media is not the best way to report a water or sewer problem.

Treasurer’s Report:
General and Enterprise Fund – We are at the end of the 11th month of the current fiscal year. I am happy to report that according to the monthly profit and loss statements the operating funds for both are in good shape.

As of 5/31/2020 no special payment requests have been initiated by residents. The Town Clerk will continue to monitor during the remaining 30 days of this quarterly bill payment.

Lehigh Update: Mayor Roop stated that Lehigh does send letters out to the residents that adjoin the quarry every 5 years outlining updates on the project.

New Business:
FY21 Budget Adoption:
A Motion to adopt the FY21 Budget, Version 3A-1, by Councilmember Hoffman, 2nd by Councilmember Palsgrove and approved with Councilmembers Hoffman, Schultz and Palsgrove voting yeah and Councilmember Smith voting nay. Budget passed 3-1.

No Parking of College Avenue:
Town Manager Dye stated that this was brought to my attention by Deputy Colussy via an email on May 21, 2020. It was probably the first time Deputy Colussy has driven on College Ave. since the white parking lines were painted on the northbound side of the road. Currently the ‘no parking’ signs have not been installed on the southbound travel lane side of College Ave.
Residents of #302 and #304 College Ave. are parking in front of their residences in the southbound travel lane causing vehicles to move into the northbound travel lane to get around them. Deputy Colussy recommends ‘no parking’ signs be installed along the southbound side of College Avenue so that there is not a head on collision from vehicles turning off of MD 75.
The typical road section for College Ave. shows parking on the south side of the road and the typical section for Blue Ridge Ave. shows parking on the west side of the road. The Pavement Marking and Signage Plan shows 1 ‘no parking’ sign on the east side of Blue Ridge Ave. and parking spaces have been stripped on the west side of the road. For College Ave. there are 2 ‘no parking’ signs shown on the north side and parking spaces have been stripped on the south side.
Another option would be to restrict parking on the southbound travel lane or north side of College Ave. in front of #302 and #304. This could be done by placing 1 ‘no parking from here to corner’ sign at the property line between #304 and #306 on north side of College Ave. #304 College Ave. is the only property that does not have a driveway for off street parking but the residents could park in designated spaces on the south side of the road or above the ‘no parking from here to corner’ sign on the north side of the road.
A discussion by the Mayor and Council recommended to have the Council take another look at the situation and be prepared to make a decision on this at the June Work Session.
